Founding Engineer of PlayOshi at Kuku FM | Full-Stack · Android · iOS · AI products

Experience

Kuku FM · **PlayOshi** (AI story app) Jul 2026 - Present

Founding Engineer (Full-Stack, Android, iOS, AI) **playoshi.app** (web) | **Google Play** (US only)

- Built the playable MVP in week one; live on the web (opens anywhere) and on Google Play (US only) in ∼**11 weeks**.
- Co-built the Android app (Kotlin, Jetpack Compose, **30+ Play builds**) and built the iOS app from scratch in SwiftUI.
- Built most of the Python, FastAPI and PostgreSQL backend; one coin ledger for **3 payment rails** (Play, iOS, web).
- Built the AI story engine, where a turn lands in seconds, and the authoring studio that splits a script into acts.
- Use AI coding tools like Claude Code daily; I own the design, code review, testing and releases (**1,800+ commits**).

Kuku FM · **WoWTV** June 2026 - Aug 2026

Performance Marketing Manager

- Ran all Google Ads campaigns for the WoWTV app.
- Tracked CAC and D0-D7 conversion funnels and scaled campaigns up or down based on the numbers.

Medinos (Taskar) May 2025 - June 2025

Product Manager Intern **Certificate** | Remote

- Reworked the information architecture for web and mobile; content discoverability up nearly **30%**.
- Built web-crawling workflows for **3,000+ product records**; usability reviews of **15+ app screens**.

Education

Indian Institute of Technology Ropar 2022 - 2026

Bachelor of Technology in **Metallurgical and Materials Engineering** Rupnagar, Punjab

Key Courses: Data Structures & Algorithms, Machine Learning in Materials, Financial Risk Management, Economics.

Projects

Sector-Wise Volatility Clustering August 2025 - November 2025

Foundation of Data Science course project under Dr. Arun Kumar **GitHub**

Portfolio Optimization and Risk Management on NIFTY 50 August 2025 - November 2025

Course project under Dr. Puneet | Pandas, NumPy, SciPy, Statsmodels, Matplotlib **GitHub**

Loan Eligibility Predictor May 2024 - June 2024

Logistic Regression, SVM, Decision Tree, KNN **GitHub**

Technical Skills

Languages: Python, Kotlin, Swift, TypeScript/JavaScript, SQL, C/C++.
Product engineering: FastAPI, PostgreSQL, React, Jetpack Compose, SwiftUI, REST and streaming APIs, Firebase.
AI: LLM apps, prompt and spec design, AI-assisted development with Claude Code.
Payments and growth: Google Play Billing, StoreKit 2, Google Ads, Firebase Analytics, mobile attribution.
Data and ML: Pandas, NumPy, Scikit-learn, Statsmodels, Matplotlib.

Position of Responsibility

UG-PG Mentor → **Co-Secretary**, ISMP | **Representative** → **Mentor**, Alankar (Music Club) | **Pronite Head**, Zeitgeist 2024

Coordinator → **Lead Coordinator**, EsportZ Club (Revanche Gaming Fest) | **Event Team Co-Head**, Zeitgeist 2023

Miscellaneous

NSTSE Medalist, Secured **AIR 226 Overall** and **AIR 1 in Mathematics** with 52/60 (Class X). **All relevant certificates**
